

# AI.DATALIFT

## Refresh your data. Refuel your thinking.

Modern businesses are driven by intelligent insights.

AI.DATALIFT provides organisations with the power to analyse their unstructured data, to identify risk, and access the insights they need, instantly.

It's a game changer!

### **FASTER RESULTS**

- > Analyse your entire data estate and review results in real-time
- > Gain advanced insights into your data using cognitive analytics with Azure
- > Identify the data that adds most value to your business

### **SMARTER DATA**

- > Manage by exception to eliminate the largest risks first
- > Accelerate and streamline processes using intelligent business insights
- > Improve your information governance and compliance processes

Your information, ready, before you need it.

### **BETTER STORAGE**

- > Rationalise your storage – identify and remove unnecessary data
- > Decommission legacy platforms
- > Future proofed, hyper-scale cloud storage to the highest certified standards

### **STRONGER SECURITY**

- > Keep your intellectual property secure with appropriate information governance
- > Automate the application of governance and remediation policies
- > Reduce exposure to data loss and regulatory fines

# Making your data work for you with AI.DATALIFT

Four steps to reliable, accessible, streamlined data management and storage.

1

## DATA DISCOVERY AND INSIGHTS

AI.DATALIFT analyses your data in situ, identifying what you have, where it's stored and its components – essential for informed and intelligent decision making.

2

## DATA CLEANSING AND MIGRATION

See what is important and put it to work. AI.DATALIFT identifies what data you need, stores it accessibly and deletes as necessary.

3

## DATA CLASSIFICATION

Know the value of your data by using AI.DATALIFT's automatic classification, to identify its role in your business, and the corresponding regulatory and compliance obligations.

4

## ADVANCED DATA WORKLOADS

Manage and report on your data, with automated policy application.
